

## Denmark Yacht Club (Inc)

5th Dec 2011

### The Director - Finance & Administration

Dear Gary

Re possibility of grant to assist the DYC to replace the Rescue Boat trailer:

Further to my enquiry with you re the above matter. I acknowledge the generosity of the Shire Council last year which granted the club \$5000 towards the total cost (\$11027) of upgrading the steering and motor. The boat trailer which should have been replaced at the same time was unable to be funded. The trailer was refurbished by the members but has continued to deteriorate and at this point in time is completely unserviceable and urgently needs to be replaced. I hereby make request to the Shire through you for any assistance that may be available to purchase a replacement trailer.

As a reminder i would make the following points:

The club rescue boat has been identified for emergency community use.  
Club members have volunteered themselves for crewing in any such emergency.

The boat and crew have escorted the Denmark Dragon boats as safety and officiating boat for several events over the last 18 months and will continue to do so in the future as well as for any other water activities as required.

Quotes attached:

I thank you for past assistance and hope for a speedy, positive, outcome.

Yours faithfully

Tony
