Enquiries: Gregg Harwood

24 May 2011

Dear Sir/Madam

Re: Closure of Sheoak Drive Park and Water Body for Fishing

I am writing in response to a request from a property owner and occupier in your area requesting that fishing be banned in the Sheoak Drive Park and its associated water body on the basis of the antisocial behaviour that this brings to the area.

Council supports the concept that closing the reserve to fishing would be a practical way to reduce this type of behaviour occurring and is seeking feedback from the wider body of property owners in the Airfield Estate before doing so.

Council is also considering naming of the reserve and the possible formation of a "friends of reserves group" and has prepared the attached survey to enable residents to give feedback on these issues and it would be appreciated if you could return the survey by the 20 June 2011.

In closing I thank for you feedback on this issue.

Should you have any queries regarding this matter please do not hesitate to contact Gregg Harwood, Director of Community and Regulatory Services on 9848 0300 or email dcrs@denmark.wa.gov.au

Yours faithfully

*Gregg Harwood
Director of Community & Regulatory Services*

Sheoak Drive Park Survey

As a result of complaints regarding antisocial behaviour Council is considering a ban on fishing in Sheoak Drive Park.

Council is considering naming of the reserve and the formation of a "Friends of Reserves Group" and has prepared the attached survey to enable residents to give feedback on these issues.

It would be appreciated if you could return this survey by the 20 June 2011.

Name: _____

Postal Address: _____

Property Owned: _____

Number of Years Owned: _____

Nature of occupancy (circle)

Owner Occupier Absentee Owner Property is rented out

Should Sheoak Drive Park be closed for Fishing? (circle YES or No)

Should Sheoak Drive Park be named? (circle YES or No)

Suggested Name? _____

Are you interested in being part of "Friends of Reserves Group" that adopts the Sheoak Drive Park. (circle YES or No)

Do you have any other comments regarding the park or its usage?

Friends of Reserves Strategy

For community volunteers engaged
in natural resource management
activities in Shire of Denmark
bushland, foreshore and coastal
reserves.

April 2010

Received and Adopted by Council at the meeting of 27th April 2010
Res 060410

CONTENTS

1. INTRODUCTION & AIMS	3
2. PRINCIPLES FOR PARTNERSHIPS	3
3. NATURAL RESOURCE MANAGEMENT ACTIVITIES IN RESERVES	4
4. SETTING UP A FRIENDS OF RESERVE GROUP: A STEP BY STEP OUTLINE	7
5. PARTNERSHIP RESPONSIBILITIES	8
6. INSURANCE & SAFETY	8

1. INTRODUCTION AND AIMS

The Denmark community has a long history of commitment to the ongoing care of our bushland reserves, including the Wilson Inlet foreshore and our coastal reserves. Of a total of 121 reserves vested with the Shire of Denmark, 80 reserves have natural resource management (NRM) requirements to ensure the maintenance of biodiversity and environmental values. (The remaining 41 reserves are for community oriented services such as drainage, emergency services sites, and communications). The Purpose of the 80 bushland/coastal reserves ranges from Conservation, Public Recreation, Parkland Management, and resource extraction (gravel and sand). 12 of the Shire's reserves are classed as A Class Reserves which secures a higher level of protection of the natural and/or community values. An immeasurable amount of bush care management works such as hand weeding, removal of rubbish, flora and fauna surveys and dieback control has been undertaken by the Denmark community in our reserves. This has been volunteer in-kind works, or funded works carried out by the Shire in collaboration with members of the community and local environmental groups, people who dedicate numerous hours of work to protecting the natural quality of Shire of Denmark reserves.

The principle aims of this strategy are:

- To facilitate a clear process for the establishment of Friends of Reserve volunteer groups;
- To outline the responsibilities of the Shire of Denmark staff and Friends of Reserve members, so as to ensure good cooperation between the Shire of Denmark and its Friends of Reserve volunteer bush carers;
- To provide the principles under which natural resource management (NRM) activities will be undertaken in reserves by Friends of Reserve groups or individuals, in partnership with the Shire of Denmark.

2. PRINCIPLES FOR PARTNERSHIPS

The Shire of Denmark greatly values the contributions of volunteers undertaking NRM actions in bushland, coastal and foreshore reserves vested with the Shire of Denmark. The Denmark community is recognised as stakeholders in the ongoing care of the Reserves, and many members of the Denmark community have knowledge and expertise which can contribute greatly to the care of Denmark's bushland, coastal, and foreshore reserves.

This strategy aims to ensure that volunteer bush care activities are undertaken with consistent NRM objectives according to sound NRM principles; that activities are carried out safely by the volunteers concerned; and that the enthusiasm and efforts of the community are supported and appreciated by Shire of Denmark staff and Council.

The following overarching principles for undertaking volunteer NRM activities in Shire of Denmark reserves must be applied:

- All activities undertaken on Shire tenure must have prior approvals and consultation with the Shire of Denmark
- All activities must be implemented in accordance with the Activity Plan developed in consultation with the relevant Shire NRM staff, which will be consistent with recommendations outlined within the relevant bushland, foreshore or coastal management plans for the reserves, as endorsed by the Shire of Denmark Council. A full comprehensive list, and copies of the Shire of Denmark adopted management plans can be found on the Shire of Denmark website located at:
<http://www.denmark.wa.gov.au/councilservices/naturalresourcesmanagement.file/nrmpplansreports.pdf>

FRIENDS OF RESERVES STRATEGY

- In the case where an adopted management plan is not yet available, any works to be undertaken by Friends of Reserve groups must be in accordance with an Activity Plan works program developed in consultation with the relevant Shire of Denmark staff, prior to implementation.
- Although there is no formal training required for participants concerned, it is strongly recommended that at least one member of the group has good foundational knowledge and experience of bushland conservation and land management techniques, and of the Shire's NRM objectives.
- Any volunteer activities in reserves which might result in the collection or removal of native seeds or plant material, or the planting of seedlings for revegetation, must have all the necessary prior approvals from Shire of Denmark staff, and must comply with any relevant formal licensing requirements and approvals by the appropriate government authority. Any plant material collected must also comply with standard procedures which outline percentage taken per plant, per population, and any seed or plant material brought in must be sourced from local provenance. Details of the species, plant material, quantity, date, participants involved, reserve site, and purpose must be provided to the Shire of Denmark and relevant approval obtained prior to any collecting activities taking place.
- Friends of Reserve group leaders need to inform the Shire of Denmark of proposed group activities and dates well in advance, in order to avoid any potential for unsafe conflicting reserve management activities, such as prescribed firebreak burns or chemical weed control spraying activities. The Shire will act as a conduit to facilitate and co-ordinate various activities occurring between Shire operations, community activities, and contractors to ensure that there is no conflict or duplication of works conducted on reserves. The Shire will inform friends groups of activities by the Shire and other government agencies (e.g. DEC, Water Corp) within the relevant reserves.

3. NATURAL RESOURCE MANAGEMENT ACTIVITIES IN RESERVES

All NRM works in reserves (such as weeding, reserve maintenance or vegetation rehabilitation) must be undertaken in accordance with the appropriate reserve management plans and with approval of the relevant Shire of Denmark staff. Where such plans & strategies do not yet exist, the Shire of Denmark will work in partnership with the volunteers, in the development of an agreed Activity Plan for the Friends of Reserve group.

The NRM activities undertaken in reserves by Friends of Reserve groups will largely depend on the level of NRM training and skills of the group and can range from basic to more specialised NRM activities. Some more specialised activities may require a process of technical training of group members, and this will be assessed on a case-by-case basis by the Shire of Denmark staff.

Training courses and workshops are offered by numerous independent organisations and government agencies for specialised activities such as field surveys of fauna and flora, dieback control, and seed collecting from native plants. The Shire of Denmark is supportive of specialised field events and training programs for Friends of Reserve members, either through courses organised by the Shire, by members of the Friends of Reserve groups, or by qualified independent organisations.

A Friends of Reserve group will, of their own concern for their members' safety, be responsible for applying appropriate Occupation Health and Safety (OH&S) procedures and ensuring members' personal safety during any works undertaken in Shire reserves. Group leaders should encourage members to wear suitable protective clothing, apply sunscreen and wear a wide brimmed hat, and should ensure that members are made aware of risks of exposure to sun when working outdoors.

Dieback treatment being undertaken in Denmark's Peace Street Reserve under specialised guidance by members of the Denmark PC Working Group and the Dieback Working Group (Perth).

In addition to on-grounds NRM works in reserves, there are further contributions that Friends of Reserves groups can make to the ongoing management of a reserve that they are caring for:

- Assist the Shire in management plans for reserves where management plans are lacking;
- Assist Shire personnel in community education;
- Report any inappropriate human activities in reserves;
- Report any natural damages or hazards in reserves, such as fallen trees, erosion on tracks, etc..

The following outline is provided as a guideline for Friends of Reserve group activities, and to assist in identifying:

- The relevant management plans or approvals which guide activities undertaken in reserves;
- The resources and technical support required to ensure the correct level of skills for the job;
- Any additional support the Shire of Denmark can offer to facilitate Friends of Reserve group activities, if required.

FRIENDS OF RESERVES STRATEGY

Nature of environmental works	Required skills and Responsibilities	Required officer approval or technical and training support
Hand Weeding	Basic skills, some training in the Bradley method of bush regeneration preferred. Appropriate OH&S when operating weeding tools including the wearing of appropriate protective clothing and gloves.	In accordance with the appropriate reserve management plan and Weeds Strategy and Action Plan 2005-2010. Weed Report form template should be completed to indicate presence of a significant weed population – the form can be found on website located under: http://www.denmark.wa.gov.au/councilservices/naturalresourcesmanagement.file/invasivespecies/documents/interagencyweedreport.pdf Training support may be provided by the Denmark Weed Action Group. Liaise with the Shire of Denmark gardener to discuss disposal of any weeded material appropriately.
Rubbish Removal	Basic skills, application of standard personal hygiene and safety precautions for dealing with potential health hazards.	Liaise with relevant Shire of Denmark waste management supervisors to ensure the appropriate removal of any rubbish collected.
Fauna and flora sightings and monitoring	Moderate to specialised skills, requires good field observation and identification skills. No samples to be taken or removed. Preferably in support of ongoing survey programs (e.g. Birds Australia Black Cockatoo Count and DEC's threatened fauna sightings) and under guidance of the appropriate authorities.	Any formal surveys and results should be noted with the Shire of Denmark NRM officer. Surveys should be consistent with existing survey form and recording form templates. All data recorded should be passed on to the Shire of Denmark for future reference. Numerous volunteer fauna and flora training and monitoring programs are available through Birds Australia, the Western Australia Museum (FrogWatch), and Department of Environment and Conservation.
Minor bush slashing for path maintenance	Basic to moderate skills, appropriate OH&S precautions and protective clothing when lifting heavy objects or using sharp cutting tools or blades.	In accordance with the appropriate reserve management plan. Approval by Shire NRM officer required for any works conducted and extent of works. All materials removed to be disposed of appropriately or liaise with the Shire of Denmark gardener to ensure the removal of any cleared plant material.
Revegetation works/Seed collection	Moderate to specialised skills required. Seed collecting only under direct guidance the Shire nurseryman. Appropriate OH&S for use of planting tools.	Approval by Shire NRM officer and Shire revegetation officer required for any regeneration planting or seed collecting activities in reserves. Seed collection protocols should be adhered to (not more than 20% per plant and per population, local provenance seed only for revegetation works) and seed collection may require Department of Environment and Conservation authorisation or licensing.
Dieback control works	Specialised skills required. Phosphite application only under direct guidance of the Denmark PC Working Group or other specialised dieback control contractors appointed by the Shire of Denmark.	In accordance with the appropriate reserve management plan and Shire of Denmark TPS Policy No.1 and Dieback Study on Peri-urban Reserves, and standardisations through Dieback Working Group Approval by Shire NRM officer required for any dieback control works undertaken in reserves.
Feral animal control	Specialised skills required. Appropriate caution in dealing with any feral animals caught in traps. No poison baiting programs will be permitted by Friends of Reserve groups.	Liaise with relevant Shire of Denmark Shire Rangers and NRM officer to ensure the recording of any feral animals sighted, and the appropriate method of removal is implemented. Handling techniques dependent upon animal trapped, plus conditions for animal ethics involved with trapping and eradication methods.
Please note: The Shire of Denmark has management responsibilities in bushland reserves which include safety to neighbouring property and people, and infrastructure, and retains the right to apply any other specific management works in any reserve vested with the Shire as required.		

4. SETTING UP A FRIENDS OF RESERVE GROUP:

A Friends of Reserve group can evolve from interested volunteers getting together and then sending a letter of request to the Shire NRM Officer. Alternatively, Council may advertise for interested volunteers to "adopt" a specific bushland, foreshore or coastal reserve.

The Friends of Reserve group, through consultation with the Shire of Denmark, will identify management objectives and suitable NRM activities for the relevant reserve. A Friends of Reserve group Activity Plan will be developed, including procedures for notification of Shire staff of proposed dates for planned activities, and keeping a record of the group's activities. The Activity Plan will ensure that proposed activities are within the skills of the group, are safe, and are consistent with Council's adopted management plan, or NRM and conservation objectives.

A STEP BY STEP PROCESS:

- 4.1 Liaise with the Shire of Denmark, or respond to an advertisement for interested volunteers, to adopt a specified reserve as a Friends of Reserve group.
- 4.2 Consult with the Shire of Denmark to receive consent to proceed.
- 4.3 In consultation with the Shire, advertise your intent to form a Friends of Reserve group (*e.g. The Denmark Bulletin, Council Conversations, community and Shire noticeboards*), and inform neighbouring property owners adjacent to the reserve of your intention, so as to be as inclusive as possible in your membership drive.
- 4.4 Form a Friends of Reserve group.
- 4.5 Registration Process: Provide a register of your key members and their contact details to the Shire. Sign a written agreement with Shire to form a Friends of Reserve group. Receive the Shire of Denmark Friends of Reserve information pack.
- 4.6 The Activity Plan: In consultation with the Shire of Denmark NRM staff, develop an Activity Plan and a procedure to record the group's activities.
- 4.7 Arrange training or obtain funding in partnership with the Shire of Denmark for any specialised activities, as necessary.
- 4.8 Utilise the local media and the Shire of Denmark website to inform the local community of your group's activities, and invite further community participation.
- 4.9 Undertake activities in accordance with the Activity Plan.
- 4.10 Keep a good record of the group's activities, and provide a copy to the Shire for their records.
- 4.11 Review activities annually with the Shire to ensure that objectives are being realised and that the group's relationship with the Shire is mutually beneficial and rewarding.

5. PARTNERSHIP RESPONSIBILITIES

5.1 The Shire of Denmark's responsibilities

The Shire of Denmark will provide guidance and support to Friends of Reserve groups through a close working relationship with the NRM officers and the Shire Revegetation officer, who are trained in bushland management and regeneration techniques. The NRM staff is competent in working with community volunteers, and will be available to group members for direct communication as required. The Shire staff members and Denmark Shire Council will:

- Consult with each Friends of Reserve group initially, and develop an agreed annual Activity Plan (see 4.6 above);
- Provide appropriate guidance and resources (training assistance, literature resources; access to expert advice; organise removal of weeded material) so that the group can undertake their Activity Plan efficiently;
- Provide assistance with small grant applications if requested;
- Provide information and feedback to the group regarding any proposed Council works in the reserves, or undertake to appropriately supervise any works undertaken by Council in reserves where Friends of Reserve groups have been doing volunteer bush care work;
- Provide personal injury insurance cover to volunteers undertaking Friends of Reserve group activities in Shire reserves, in accordance with the group's agreed Activity Plan.

5.2 The Friends of Reserve group's responsibilities

The Friends of Reserve group will implement the annual Activity Plan as agreed with the Shire NRM officers. The group will liaise with the Shire NRM staff to ensure that:

- The work is in accordance with the Activity Plan, and to a standard appropriate to the skills of the group;
- The activities performed by the group are recorded in a form that is accessible to the Shire NRM officer and/or to the public on request ;
- The group will take responsibility for appropriate training if the Shire NRM staff is concerned that an activity is not at an adequate standard, or that the actions of the group are being detrimental to the environmental values of the reserve;
- The group will take responsibility for their members' safety and sun sense when working outdoors in native karri/jarrah bushland, and inform members of the associated dangers of this kind of work (snakes, insects, sharp object hazards, trip hazards, falling tree limbs, sun exposure, dehydration, etc).

6. INSURANCE AND PERSONAL SAFETY

Volunteer workers undertaking bush caring activities in Shire of Denmark reserves, in accordance with an Activity Plan as agreed upon by the Shire of Denmark, are eligible for personal injury insurance cover under Shire of Denmark's Personal Accident Insurance Policy. Friends of Reserve groups may, for their own purposes, become incorporated groups (i.e. for funding purposes), and the group can then take out its own public liability insurance policy. Local Community Insurance Services (LCIS) offers affordable cover via www.localcommunityinsurance.com.au .

The majority of bush care activities undertaken by volunteers in Shire reserves should have a relatively low risk of personal injury (e.g. weeding, rubbish collection, minor track maintenance works, revegetation, etc). However, strict safety precautions are necessary for the use of herbicides/chemicals and electrical/mechanical power equipment on Shire reserves. Where a hazardous activity has been approved in the Activity Plan, the operators undertaking the activity will need to register their details with the Shire, be appropriately skilled and/or licensed, and apply correct safety arrangements. Where possible, the operator should be undertaking the works as a contractor to the Shire of Denmark Council.

ACKNOWLEDGEMENTS

The Shire of Denmark acknowledges the use of the Shire of Busselton's Friends of Reserves Strategy in the development of this strategy. The Shire of Denmark sincerely thanks the community members who commented on the draft document, and provided very useful input for the improvement of the draft.

NO. YEARS OWNED	NATURE OF OCCUPANCY	SHOULD BE CLOSED FOR FISHING	SHOULD BE NAMED	SUGGESTED NAME	INTERESTED IN BEING FREINDS OF RESERVE	COMMENTS
16	Owner Occupier	Yes	Yes	Tigersnake Reserve OR Sheoak Park	Yes	I live beside the Reserve and bought here because the waterway was a 'conservation wetland' - Not a public fishing place - It's got out of hand. I already look after the area, mowing where Shire mower can't access. A seat has been placed by Shire, but isn't on Reserve property. I would appreciate any improvements/help but before planting anything, PLEASE consult me first. (No more eucalyptus) fire hazard. East Denmark Fire Brigade meet and practice at this Reserve. Our standpipe has been tampered with during marron season, many years now.
13	Owner Occupier	Yes	Yes	Sheoak Park	No	
11	Owner Occupier	Yes	Yes		No	We appreciate that the Shire has been recently maintaining the mowing of the park. Thank you.
10	Owner Occupier	No	No			I believe the park should be left as is. In the ten years of living here this is the first time I've heard of antisocial behaviour. I done believe children, swimming, fishing, playing in the area is antisocial and would rather see them out and about than stuck inside the house.
5	Owner Occupier		Yes	Sheoak Rest (NOT named after a person)	No	If closed who will police the park? To be developed into a picnic area with gazebo, fixed table and chairs, BBQ and toilets.
17	Owner Occupier	Yes	Yes	Reflection Park	Yes	
14	Absentee Owner	No	No		No	I have been fishing there with my son who lives in Denmark and have never seen any antisocial behaviour and always enjoyed the evening out in the park and wish to continue to do so.
6	Owner Occupier	Yes	Yes	Sheoak Waters or after a well known resident?	Yes	We would not like the overnight camping, though a picnic table would be nice.
1	Owner Occupier	Yes	Yes	Sheoak Park	No	
4	Owner Occupier	Yes	Yes	Sheoak Reserve	Yes	Great idea to keep the louts out - hopefully!
6	Owner Occupier	Yes	Yes	Sheoak Reserve	No	
4	Owner Occupier	No	No		No	I don't care about a name, but the park should be improved. I.e. - swings for kids, shaded benches.....! Antisocial behaviour should always be addressed (i.e. - littering, trespassing) but a total ban on fishing/socialising at the park, even for local residence is an over reaction. Get the Rangers to fine people who misbehave, no need to punish <u>everybody</u> for the sins of a few.
11	Owner Occupier	Yes	Yes	The Bronnie Wallace Park	Yes	It is a shame outside visitors abuse the marron fishing in the lake, it spoils this pleasure for locals. Unfortunately bad behaviour means the closure of this facility.
Total	13 Respondents	9 closed to fishing 4 open to fishing	Named 10 No Name 3		Friends of Reserves 4 Not interested 9

Mr Dale Stewart
Chief Executive Officer
Denmark Shire
953 Sth Coast Hwy

Dear Mr Stewart,

There are a few other personal details which I didn't need to put to the other letter, which I would like to bring to your attention, pertaining to the fishing of marron from the Sheoak Dve waterhole.

When I purchased this property that waterhole belonged to the property now owned by Jo White. That side of the road was re-subdivided by the developer and the Dam excised for some Public Open Space, which there was none.

It was lovely to have a place to meet people and families were using it, but then came Marron season, and my life, during that time is now quite frightening.

1. People come to my house and ask for phone or toilet use.
2. I have been picking up all the rubbish left behind by the fishers for over 10 years, and every year it is worse than the year before. Especially the tin cans that are being left in the water and empty bottles sunk instead of disposing of them properly.
3. The drinking of alcohol all day and night, smashing empties, and driving off to goodness knows where, (has always been a concern.)
I have come home from work and found an empty Vodka bottle at my door.
4. Chairs have been removed from my veranda and taken down to the water and left.
5. Undersized marron have been squashed and left to die.
6. I am a shift worker at the Denmark hospital and it's obvious when I'm home and when I'm not.

I feel I have to turn lights on in the house before going to work at 2.30pm, so it looks like I'm home. (My power bill is double in January)
I worry while I'm at work, and I now worry about coming home to torch lights dotted about, all night sometimes, and they're not quiet people.
I live alone and only feel frightened during marron season.

7. Two car loads of Aborigines come from Albany and came to my house this year to ask what I'd done with their fishing equipment they hid in my bush. After I went to work, they helped themselves to my shed.
8. I've had rude people, camping in a Toyota Coaster Bus from Victoria, right in front of my house. Even when I called the Ranger, they didn't leave after he did.
9. Other Residents from around here do mention often about 'Whats Going On At The Dam', and ask how I manage to put up with it??
Other Residents also have clearly stated they won't come down to the Dam during that time of year because of the Strangers, hanging around..

16 Feb 2011

Dear Mr Stewart,

I have spoken to Councillor Dawn Pedro about the problems I am having with the fishing season for Marron in the Dam on your Council land adjoining my property.

All adjoining land owners have had theft of marron from their properties and reported this to the Police. This happens every year, after dark.

Property owners from this subdivision would like you to stop the marron fishing, and destruction of the reeds (hunting for marron habitat). The pulling up of the reeds was a new activity this year, as there was a shortage of marron, so people dug up the holes.

This is a very special place for Residents and their children to meet, play, swim and picnic, but during the school holidays, which is also marron season, we have had a lot of undesirable kinds of people, not from this subdivision, or even Denmark, camping, or overstaying their welcome.

This is a spot we could be proud of instead of avoiding.

East Denmark Bushfire Brigade meet and train here, and this could be a great place once the word got out there was no longer any fishing.

The Ranger Mr Dimmock was called out to a Bus, camping for 2-3 days.

This dam has been left every day with either rotting meat, tins of dog food and tuna left in the water, plus bags of rubbish and bottles left everywhere.

Branches are ripped off anything looking like a tree to secure fishing equipment, and also left sticking up in the water with lengths of nylon tied on, often still with bones or old socks full of dog food left on the ends.

Very seldomly have I ever seen other residents from this subdivision fishing here, and if I didn't live right here I wouldn't send my children down to meet or play alone during that time because of all the strangers from elsewhere.

If people keep polluting the dam, and taking from it what is meant to clean it up, we won't have something to be proud of. This waterway runs down into the Denmark River and into the inlet.

Thank you for your attention to this matter,

Bronnie Wallace

We the undersigned, Community and residents of this Subdivision hereby formally request that you look favourably to banning fishing from this waterhole.

Ronwyn Wallace. 100 SHEOAK DVE, DENMARK.

B. Wallace
