

Road Naming within the Shire of Denmark Policy

15 August 2023 - Attachment 9.4.2

1. PURPOSE

1. To keep a register of names that have been considered by Council to be suitable for use within the Shire of Denmark for roads that require a new name or are named for the first time.
2. To record the process that the Shire's administration must adhere to should a name be approved by Landgate's Geographic Names Committee which has not been previously considered for use by the Council.

2. POLICY

Policy

When considering a new name for potential use within the Denmark District, the Shire of Denmark will assess the name against the guidelines in Landgate's *Policies and Standards for Geographical Naming in WA*.

The names listed in the table below have been considered and approved by Council at some point in time. If known the date of former Landgate approval and/or Council approval has been noted in the comments column.

Prior to allocating any of the names in the table to rename a road reserve or name a new road reserve, the name must be referred to the Geographic Names Committee (GNC) for approval.

Should any of the names in the table be allocated to road reserves, the names will be automatically removed from the reserved names list.
