Context

This protocol recognises that in accordance with the *Road Traffic Code 2000* (the Code): Regulation 297(2), Instrument of Authorisation (IoA) issued to the Shire of Denmark by the Commissioner (the Commissioner) of Main Roads Western Australia (MRWA), the Shire of Denmark is obliged to develop and implement traffic management procedures that will satisfy the Commissioner, that work on roads within the Shire of Denmark will always comply with the "Traffic Management for Works on Roads Code of Practice".

Statement

The Shire of Denmark actively supports the MRWA "Traffic Management for Works on Road Code of Practice" (Works Code of Practice) and will conduct its business in such a way as to:

1. Comply with the requirements of the latest amendment to the Works Code of Practice AND AS1742.3 for all work within the road reserve undertaken by the Shire of Denmark and its agents;
2. Authorise other parties not subject to an IoA to implement roadworks traffic management within their jurisdiction. Prior to and after authorisation is given, the Shire of Denmark shall ensure that the traffic management is in accordance with the "Works Code of Practice".
3. Recognise that it has a duty of care under the Occupational Safety and Health Act 1984 to provide and maintain a safe place of work for its employees, consultants, agents and contractors to ensure that persons who have access to the workplace including road users are not exposed to hazards.
4. Ensure that a generic or specific (dependant on situation) traffic management plan (TMP) has been prepared for all works within the road reserve that require traffic management.
5. Keep a record of the traffic management plans and in particular the sign and device arrangement and any changes to such during the works for a period of seven (7) years from the date of completion of the works.

6. Ensure operational road works traffic management tasks are only undertaken by persons who are accredited or are directly managed onsite by a person with MRWA - Basic Worksite Traffic Management accreditation. Where persons are controlling traffic they shall have MRWA – Traffic controller accreditation.
7. Ensure that appropriate training is given to allow for the preparation, modification, review and recommendation of TMP's for roadworks sites.

Procedure: Traffic Management for Works on Roads

Overview

Any party undertaking work within the Shire of Denmark shall assess the need for a Traffic Management Plan (TMP). The Shire of Denmark shall check the assessment to ensure a TMP has been provided where required. Where a TMP is required the Shire of Denmark shall ensure that the TMP adequately provides for the safety of workers and road users, while maintaining an adequate level of service. All TMP's shall be prepared, reviewed and implemented by a person holding appropriate Main Roads WA accreditation. This will occur prior to the Shire of Denmark authorising the TMP for implementation.

Quality Assurance

Prior to proceeding with any TMP, requirements for assurance of quality shall be as follows:

1. Personnel
 - a) The person preparing the TMP is Advanced Worksite Traffic Management (AWTM) accredited;
1. The person reviewing the TMP is Worksite Traffic Management (WTM) or AWTM accredited OR has an equivalent level of knowledge and experience;
2. The person reviewing the TMP has a Main Roads WA account and is subscribed to Traffic Management updates (go to www.mainroads.wa.gov.au > My Account)
3. The person supervising / managing the implementation of the TMP is accredited with Basic Worksite Traffic Management (BWTM).
4. The Traffic Management Plan
 1. The TMP has been checked for suitability. For guidance refer to MRWA Suitability Checklist (<https://www.mainroads.wa.gov.au> >Our Roads>Traffic Management>Plan Preparation>Traffic Management Checklists).
 2. The TMP is appropriate ensuring there are no conflicting works or events at / or near the location.
 3. The Shire of Denmark will occasionally arrange for onsite review of traffic management at roadwork sites ensuring compliance with Works Code of Practice (this include both internal and external works). This will be undertaken by a WTM or AWTM accredited person OR a person with an equivalent level of knowledge and experience.

Traffic Management Plan Process

TMP Preparation Process

1. The TMP preparation shall be carried out in advance of the works and shall allow time needed to carry out consultation, sufficient notification, authorisation and implementation. Projects affecting ratepayers and businesses may require significant consultation and advertising of works.
2. The TMP shall be submitted to the authorising officer for review.

TMP Authorisation Process

1. Authorising officer is to determine if the traffic management scheme is simple or complex in nature (as per section 5.2.2 of Works Code of Practice) and do the following:
 1. Complex –TMP is to be forwarded to a suitably qualified Roadworks Traffic Manager (RTM) for endorsement (RTM to liaise with plan author and authorising officer) prior to road authority authorisation.
 2. Simple – authorising officer to check the TMP for suitability (see section 2 above).

2. Where there is non-compliance, the author is to be contacted with the recommended changes and asked to either:
 1. Check the recommendations and modify the TMP if appropriate; or
 2. Justify the existing plan against the appropriate standards.
3. Once the TMP has been deemed to be suitable by the authorising officer, the TMP will be authorised for implementation by the Chief Executive Officer or their delegate (either by signature on the TMP cover page or by emailing and referencing the TMP number and revision number).

Post Implementation Review Process

To improve traffic management on the network, on-site inspections and operational checks should be performed (where required) once the TMP has been implemented:

1. The onsite inspection is a check of the signs, devices, method statements and workers accreditation applied on site. This should ideally be done by someone holding a Basic Worksite Traffic Management (BWTM) accreditation. This ensures that all traffic management including appropriate after care is being implemented at the correct stage of the works.
2. For complex or long term worksites; an operational check involves an onsite drive through and check of the operation of the traffic management focussing on road efficiency, road user compliance and road safety should be undertaken by the authorising officer or an appropriately trained (WTM/AWTM) independent contractor.
