

To the Shire of Denmark President Ceinwen Gearon:

**We the undersigned are opposed to the new changes to the Dog Exercise Areas (Leash Free) at Reserve 20578, known as Prawn Rock Channel including the adjoining Wilson Inlet delta and sandflats.**

We call on the Shire to:

1. Reject the changes to this area as per Resolution 060521(18 May 2021 Denmark Council Meeting).
2. Return the area to Resolution 131114, Point 2, (11 Nov. 2014 Denmark Council Meeting)

- The current Off Leash Area is not a workable scenario. It is causing divisiveness, angst, anger and in some cases conflict within the community.
- This area is of high usage by dog owners, whose numbers continue to increase annually. The new reduction in the area is disproportionate to its high usage. (Current dog registrations = 1287)
- Diminishing this area makes no accommodation for the continuing growth of dog usage by community, tourists and day visitors.
- This area is the only easily accessible, flat landscape with safe waters for all members of the dog community. By minimising it the Shire has discriminated against those in the community and their dogs who cannot access other "like" areas.
- Due to the seasonally changing depth of the Inlet water and sandbank formations, the arbitrary boundary across these waters does not allow for the safe access for dogs and owners to the Nullaki and the beach.
- This area is of great significance to the fabric of the dog community, young and old, both for their mental and physical health providing them with a safe, accessible area to engage with other people whilst also socialising their dogs.

Notice to Petitioners to be given to: Karen Winer, 29 Heather Rd, Ocean Beach 6333.

- This area is the only easily accessible, flat landscape with safe waters for all members of the dog community. By minimising it the Shire has discriminated against those in the community and their dogs who cannot access other "like" areas.
- Due to the seasonally changing depth of the Inlet water and sandbank formations, the arbitrary boundary across these waters does not allow for the safe access for dogs and owners to the Nullaki and the beach.
- This area is of great significance to the fabric of the dog community, young and old, both for their mental and physical health providing them with a safe, accessible area to engage with other people whilst also socialising their dogs.

Notice to Petitioners to be given to: Karen Winer, 29 Heather Rd, Ocean Beach 6333.

To the Shire of Denmark President Ceinwen Gearon:

**We the undersigned are opposed to the new changes to the Dog Exercise Areas (Leash Free) at Reserve 20578, known as Prawn Rock Channel including the adjoining Wilson Inlet delta and sandflats.**

We call on the Shire to:

1. Reject the changes to this area as per Resolution 060521(18 May 2021 Denmark Council Meeting).
2. Return the area to Resolution 131114, Point 2, (11 Nov. 2014 Denmark Council Meeting)

- The current Off Leash Area is not a workable scenario. It is causing divisiveness, angst, anger and in some cases conflict within the community.
- This area is of high usage by dog owners, whose numbers continue to increase annually. The new reduction in the area is disproportionate to its high usage. (Current dog registrations = 1287)
- Diminishing this area makes no accommodation for the continuing growth of dog usage by community, tourists and day visitors.
- This area is the only easily accessible, flat landscape with safe waters for all members of the dog community. By minimising it the Shire has discriminated against those in the community and their dogs who cannot access other "like" areas.
