Dear Dale

**Regarding Seedlings from Denmark Shire Nursery for Community biodiversity projects on public land in Denmark.**

Green Skills is planning two revegetation projects on public land in 2011 for which we are seeking local species grown from local provenance seed. The first project is on Denmark River foreshore land ( section of riverbank upstream from the foot bridge adjacent to the Denmark Agricultural College land) for which we are seeking around 1680 local plants(see Table 1 below). The second project is for understory planting at the Wetland centre, Atkinson Road, adjacent to the Golf Course reserve for which we are seeking around 840 native plants.

I understand that Shire of Denmark normally charges in the order of 73c +GST per seeding. In previous years Green Skills has applied to the Council for a grant of an allocation of plants for specific projects on Shire or public land (ie Rail Trail reserve or beside the High School oval). In return Green Skills arranged to organise the provision of at least 120 hours of volunteer labour to assist Mark Parre with nursery propagation and related tasks over the growing season 2010/2011.

Would it be possible for Green Skills to either:

- 1) be provided with an allocation of these 1680 + 890 (=2570) plants by the shire in return for organizing at least 120 hours of community labour to assist with nursery work over the 2010/2011 growing season) or
- 2) to 2) to pay for these 1680+ 890 plants for a reduced fee (perhaps 50% of the 73c/plant cost) by the shire in return for organizing at least 120 hours of labour to assist with nursery work over the 2010/2011 growing season.

These are community planting projects and we would be working with the Denmark High School and Denmark College of Agriculture to have their students participate in the plantings.

I look forward to your response on this.

Table 1

Plants sought for Denmark River Foreshore planting (adjacent to Denmark Agricultural College on foreshore land)

| <i>Name of Species (available for propagation)</i> | <i>Number (trays 56 in each tray)</i> |
|--|---------------------------------------|
|  |                                       |
| Hakea oleifolia                                    | 112                                   |
| Taxandria parviceps                                | 168                                   |
| Bossiea linophylla                                 | 112                                   |
| Acacia pentadenia                                  | 168                                   |
| Acacia browniana                                   | 168                                   |
| Banksia grandis                                    | 56                                    |
| Macrozamia reidleyi                                | 56                                    |
| Melaleuca thymoides                                | 112                                   |
| Hovea elliptica                                    | 168                                   |
| Acacia pulchella                                   | 112                                   |
| Acacia alata                                       | 168                                   |
| Anigosanthos flavidus                              | 168                                   |
| Patersonia occidentalis                            | 112                                   |
| <b>Total</b>                                       | <b>1680</b>                           |
