# INFORMATION SHEET: COLOUR REQUIREMENTS

---

The Shire of Denmark has specific areas that are subject to exterior building material and colour requirements as stipulated in various Town Planning Scheme No. 3 and policy provisions. In order to provide direction as to what colours are appropriate the following interpretations apply:

- Any reference to 'natural earth', 'subtle earth' or 'natural hues' colour or 'sympathetic' colour – all colour tones are appropriate;
- Any reference to 'vegetation' colour excluding the specific reference to 'green vegetation' colour – all tones of green, brown, yellow, orange, shades of blue and red are appropriate; and
- Any reference to 'earth brown' colour or 'brown toning' – all tones of brown, including limestone and red/terracotta colours are appropriate.

The colour 'Surfmist' is considered to be 'white' or 'off-white' and therefore may not be permitted in certain zones.

Colour requirement provisions regularly apply to the Shire's Special Residential and Special Rural zones.

There are currently no colour restrictions in the rural zone, nor the residential zone.

For more information in relation to colour requirements and to ascertain the relevant special provisions, please do not hesitate to contact planning services staff:
