About Me & Why I'm Standing

I am running for Council to bring practical, transparent leadership that keeps focused on real local government priorities without unnecessary bureaucracy. My aim is for the Shire of Denmark to deliver outcomes that honour our natural landscape, values and small-town character.

Community & Service Background

I am a proud resident living here with my family for over six years, contributing as a GP in Denmark and supporting our local Emergency Department. In addition, I am an Educator for the College of GPs, working to attract and support new doctors in regional practice.

I have Previously practiced in Perth's hospitals and GP clinics, with earlier service in the Navy and the United Nations - experiences that shaped my commitment to community, service and accountability.

Resilient & Connected

Last year, a serious tractor accident tested me and my family but highlighted the real community strength of Denmark. Your care during that time - your kindness, messages, and help - has shaped how I want to lead: with empathy, openness and a grounding in genuine local connection.

What I Stand For

Accountability & Common Sense: A Council that stays focused on its mandate and achieves practical results, without red tape or overreach.

Transparent Governance: Clear, open decision-making that keeps residents informed, heard, and included.

Sustainable Growth: Planning for the future in ways that protect our region's character, environment, and lifestyle.

Community at the Core: Ensuring Council listens equally to long-standing locals, newer families, businesses, and volunteers so that everyone's voice matters.

My Promise: To serve Denmark with integrity, clarity, and an unwavering commitment to keeping our community strong, connected, and flourishing.
