CAMPBELL, Clare

I am Director of an international wildlife conservation organisation. Having moved permanently to our small farm in Denmark with my husband and son, I feel a great sense of responsibility to protect this incredible environment for which we are shared custodians. A dedicated environmental advocate, I aim to address global issues at the local level. I also support diverse education, development of the arts, creative support for mental health, and careful management of low impact tourism that benefits our community. In these times of great uncertainty I will seek opportunities for understanding and promote unity and connection. I will bring an open mind, integrity and common sense to my Councillor role and hope that my fresh perspective will support inclusive and progressive decision making.
